

## Torsten Wegener, Member of the Executive Board

**'Building and promoting data literacy across the board is one of the most important tasks for me during the digital transformation that's taking place in companies. The important thing here is to make decisions based on the analysis of existing data and use the insights gained from this to enhance existing business models and design completely new ones: Models that focus on the benefit to the customer and present a digital offer that is tailored to them at any given time. In this sense, I identify with the credo of adesso, which does not act as a mere contract manufacturer, but rather as an interdisciplinary network from the customer's perspective.'**

Torsten Wegener (born 1966) is a member of the Executive Board and responsible for the business divisions Data & Analytics, Microsoft and Digital Experience at adesso.

The IT manager has many years of experience as a tech founder and managing director of his own successful IT companies both at home and abroad: As early as 1990 – while still studying computer science in Hamburg, Germany – Wegener founded the internationally active DD SYNERGY Group, which he sold to a listed company ten years later.

In 2004, Wegener was again managing partner of the fast-growing IT company C:1 Solutions. In 2013, the company along with its top management was taken over by the US company Cognizant Technology Solutions (CTSH). Torsten Wegener worked as a manager for CTSH in Germany until 2020: Here, he was initially responsible for the Data-driven Business division as Vice President Artificial Intelligence & Analytics and later, as Vice President Digital Business, also for the areas of Digital Strategy, Interactive, IoT and Digital Engineering. During this time, Wegener played a decisive role in shaping the company's consistently growth-oriented strategy.
